## Enterprise Finance Transformation – Without Enterprise ERP Complexity

Finance leaders are under increasing pressure to deliver real-time insights, steer profitability, and enable scalable growth. Yet many organizations are still held back by fragmented systems, manual processes, and lengthy transformation programs.

### Why Finance Transformation Can't Wait

Today's finance landscape creates hidden risks and missed opportunities:

- Decisions are based on **outdated or manually consolidated data**
- Limited visibility into **cash positions, margins, and cost drivers**
- Growing complexity from **new entities, acquisitions, and expansion**
- Increased compliance risks due to **inconsistent processes and controls**
- Finance teams spend too much time on **data preparation instead of value creation**

The result: Finance operates reactively, reporting the past instead of shaping the future.

# A Smarter Way to Transform Finance

- **Go live in 8–12 weeks**, not years
- **Predictable investment** through a fixed-scope approach (starting from kCHF 149)
- Immediate access to **SAP best-practice finance processes**
- Reduced project risk with template-driven implementation
- Future-ready **cloud platform** enabling automation and AI-driven insights

## Get SAP Cloud ERP in 8–12 weeks

**PHASE 0 – 1 week**  
Scoping

**PHASE 2 – 3 week s**  
Solution design

**PHASE 1 – 2 week s**  
Configuration workbook  
Q&A

**PHASE 3 – 2 week s**  
Onboarding

**Support after  
go-live**  
(length depends  
on the  
contracted  
package)

**Customer environment**

## Business Impact You Can Expect

- **Real-time financial visibility** across entities and business units
- **Faster closing, planning, and forecasting cycles**
- Improved **working capital and liquidity management**
- **Reduced IT complexity and operational costs**
- Scalable finance foundation supporting **growth and innovation**
