

SBM MINERAL PROCESSING

CNT Success Story

Successful project completion at SBM

The traditional Austrian company SBM Mineral Processing GmbH is one of the leading full-range suppliers of processing and conveying plants for the raw materials and recycling industry and of concrete mixing plants for ready-mix and plant concrete. SBM stands for more than 60 years of experience and has established itself on the world market as a provider of complete solutions for the highest requirements.

CNT Management Consulting

INITIAL SITUATION

SBM Mineral Processing is part of the MFL Group and after the successful project "ERP Optimization Mechanical Engineering" at MFL in Liezen in 2019, the solution could now also be successfully rolled out and put into operation at SBM Mineral Processing.

In the project execution, it was necessary to have a continuous possibility to check the cost side of the projects against the budget in order to give the project managers the possibility to monitor the project commercially and to bring it to a successful conclusion.
The continuous possibility of checking costs against the budget was essential.

MAIN GOALS

The main objective of the project was to map the processing of projects in the special equipment environment in SAP R/3. For this purpose, it was necessary to design a continuous process, from the receipt of the order from the customer to the internal project completion. In addition, the goal was to ensure continuous budget and cost control over the entire project duration in order to provide the project manager with a tool for commercial project control. These goals were achieved by including SAP PS and the proSolution AddOn proCosting.

"Thanks to professional project management, we were able to successfully implement the project at SBM within a few months. The complete presentation of the cost development in SAP including project preview integrated in SAP was the central project content."

Walter Pircher
Director Materials Management & SAP

Management Consulting

Your contact:

The SAP consulting company CNT Management Consulting AG was founded in Vienna in 1999. Around 300 consultants support companies in Austria, Germany, Switzerland, Belgium, Italy, USA and Brazil in all areas of SAP integration.
With a turnover of around 67 million euros (2020), the company is one of the market leaders for SAP consulting in Austria and is targeting further turnover and employee growth in the coming years.

Oliver Sommer
Project Manager

SOLUTION

It was necessary to adapt the process in such a way that the project management has a simple possibility to monitor the costs of the projects in the special plant engineering from the project planning to the internal project conclusion.
For this purpose, SAP standard options should be used together with the proSolution AddOn proCosting as far as possible and the following goals should be achieved:

- Efficient planning and processing of customer projects
- Continuous overall processes can be mapped in a homogeneous system landscape
- Cost and budget planning on P&L basis
- No data redundancies

YOUR BENEFIT

- Optimization of the overall process of project planning and implementation
- Consistency of the overall process
- Increased efficiency through standardized process flows
- Transparent project cost controlling
