

CNT Success Story

*We partner your plant.
Lifelong.*

Founded in 1961, Kremsmüller is a family-run industrial plant construction company known for its premium quality and versatility. With around 1,700 employees, the company offers services for all project phases – from planning and assembly to maintenance. The main business divisions are pipeline construction and mechanical engineering, apparatus construction, I&C technology, and telecommunications technology.

INITIAL SITUATION

In 2022, Kremsmueller Austria began to redesign its processes and IT landscape.

A key aspect in this regard was the DIGI-Kremserl project for the implementation of SAP S/4HANA.

The project kicked off at the end of 2023 with the aim of setting up and rolling out the future SAP S/4HANA system on the basis of SAP standard processes using a greenfield approach.

The project was successfully completed in mid-2025 with the go-live of SAP S/4HANA.

MAIN GOALS

The overall project's aim was supported by and realized through the objectives for the individual process areas:

- Providing services for customers is the main focus
- A single source for all relevant information
- Lean and modern organization
- Making corporate success plannable

“Using an intelligent, networked approach, we create efficient processes that allow us to meet customer requirements quickly, reliably, and sustainably.”

Gregor Kremsmüller
General Management

Your contact:

The SAP consulting company CNT Management Consulting AG was founded in Vienna in 1999. Around 500 consultants support companies in Austria, Germany, Switzerland, Belgium, the Netherlands, Italy, Spain, the USA, and Brazil in all areas of SAP integration. With sales of around EUR 135 million (2024), the company is one of the market leaders for SAP consulting in Austria and is aiming for further sales and employee growth in the coming years.

Project manager

SOLUTION

SAP S/4HANA standardizes both the processes and the IT landscape of Kremsmueller.

- Greatest possible standardization of processes in Austria across the four business divisions
- Company-wide harmonization of organizational structures and master data
- Processes based on SAP Best Practices
- Use of CNT proSolutions
- Creation of robust interfaces to other IT systems

YOUR BENEFIT

The implementation of SAP S/4HANA allows for integrated, standardized processes in a central system.

- Consistent flow of information throughout the entire organization
- Training of all users regarding the new processes and systems
- Reduced total cost of ownership (TCO) through process standardization and use of a modern, cloud-based IT infrastructure
- Consolidated reporting via a standardized database
- Creation of a basis for digital transformation
